MODULAR LEARNING SYSTEM

Schools are constantly adapting to a shifting population of students. Kids come in different sizes and their environment needs to reflect that. The flexibility of myWall means that teachers can change the placement of the installation to fit the height of the child. It's also quick and easy to reposition.

Most versatile educational display system on the market in the United States.

While many clients use myWall as shelves and/or desks, we also offer a wide range of custom learning tools that build children's motor skills, dexterity and problem solving. Some examples: rock climbing, ball tracking, pulleys/cranes, water play, ring toss, and more.

AdaptivDC is the proud provider of the (Thinkterior) myWall Inline Display System, a breakthrough in display hardware, and provides design, fabrication and installation to business clients across the United States.

The myWall Inline Learning System is an out-of-the-box educational solution that allows you to customize your school according to the needs of the day. It's load bearing (pile on the product!); easy to assemble/disassemble; and its' high-quality design and construction give you the ability to organize your classroom to the best effect again and again. The wide range of available accessories allow additions and modifications over time.

Form and Function, Every Time.

Overall system is customizable into many other structure shapes and configurations.

Key Point!

myWall's patent pending locking pin system allows users to use both the front or back of the wall panels for product display, storage, and increased marketing surface.

Thanks to the locking pins, myWall becomes an ultra safe display surface capable of handling all the equipment and product you want to throw at it.

ABOUT MYWALL

The myWall Inline Learning System is the perfect piece of mobile infrastructure for schools looking to make their facilities stand out. Rooted in design cues derived from both Scandinavian and Japanese design, the high-quality myWall system is designed to provide schools with a mobile, modular and customizable educational display system ready to be used time and again. It's extremely sturdy and load bearing--perfect for students. The freedom of customization makes it unique for every student.

KEY FEATURES

- High-end design
- Easily customizable, wide variety of accessories
- Sturdily crafted
- Increase ROI, use again and again
- Easy to assemble, minimal tools
- Don't be generic, stand out
- Cost efficient compared to fully customized solutions
- Complete customization with modular plug-and-play shelving
- Durable, environmentally friendly hardwood panels (recycled aluminum & renewable rubber wood)
- Modular savings: start simple and build up on a budget
- Structural support for products, displays, TV's, etc.
- Load bearing system for heavy object display

HOW THE SYSTEM WORKS

myWall locking pin system

This patent pending locking pin system allows users to use both the front or the back of the wall panels for product display, storage, and marketing surface.

With the use of locking pins, the structure becomes a safe display surface for multiple objects on display.

Pins work on both the front and back of the wall system, providing extra storage behind your wall. (when in cube setup)

PRODUCT STRUCTURE DETAILS

Product Items List

- 1 myWall upper panel

- 2 myWall lower panel

- 3 French Cleat Bracket

- 4 myWall vertical support

- 5 myWall upper/lower connector

myWall panels attach as an upper and lower section, that then hang onto upper horizontal french cleat mounted to wall.

RENEWABLE RESOURCES

The myWall system uses rubber wood, a renewable and sustainable byproduct of the latex industry.

Reduce: We work with our manufacturing partners to ensure we are leaving as small a carbon footprint as possible.

Re-use: Our products are durable and designed to last, cutting down the need to discard our products and purchase new ones.

Recycle: Our products and components use recyclable materials.
